SUBJECT INDEX, VOLUME 15

Titles of papers are given in italics

Aerial spraying, defoliants 241
Aircraft, defoliation of *Hevea brasiliensis* by spraying 249
Aldrin, control of *Coptotermes curvignathus* 215
'Amines' in latex, effect on polymerisation 207

Bacteria
  from ammoniated field latex 72
  from ammoniated latex concentrate 72
  from fresh *Hevea* latex 72
Bacterial Culture Media from Hevea Latex 19
Bark analysis
  and foliar diagnosis 109
  with leaf analysis as a diagnostic procedure 114
Bark
  composition 114
  renewal, stimulation 53
Buddings, stimulation of bark renewal 69

Calcium carbonate, effect on mineralisation of nitrogen in soil 175
Calcium
  effect on molybdenum status 141, 147
  in roots 137
  in rubber seedlings 99
  photometric estimation of 86
Carbohydrates, in seedlings 100
Centrosema pubescens, nitrogen fixation 168
Chemical analysis, *Hevea* leaves 86
Chemical composition of rubber plants
  effect of cobalt 134
  effect of molybdenum 144
  effect of zinc 162
Chlordane, control of *Coptotermes curvignathus* 215
Chlorinated hydrocarbons, control of *Coptotermes curvignathus* 209
Climate, and pink disease of *Hevea* 285
Clonal seedlings, stimulation of bark renewal 66

Clones:
Gl 1 31, 290
PB 86 31, 290
Pil B84 31
Pil D65 31
RRIM 501 290
RRIM 618 290
Tjir 1 31, 290
resistance and susceptibility to pink disease 283
Cobalt: Effects on the Growth and Composition of Hevea 128
Control of Coptotermes curvignathus Holmgren with Chlorinated Hydrocarbons 209
Coptotermes curvignathus, control 209
Corticium salmonicolor, pink disease of *Hevea* 275
Cover plants
'clover sickness' 13
effects on soil characteristics 6
moisture 11
nitrogen status 7
nutrient status 7, 175
organic matter 6
structure 6
establishment 4
leaf and stem diseases 12
root diseases 12
Cover Plants in Rubber Cultivation 2
Creping, Superior Processing rubber 216
Crude fibre content, rubber seedlings 101

DDT 210
Deficiency symptoms
manganese 24
magnesium 24
Defoliants 242
Defoliation of Hevea brasiliensis by Aerial Spraying 241
Dieldrin, control of *Coptotermes curvignathus* 209
Diesoline, tree poisoning 191, 193
Dothidella ulei 241

Effects of Cover Plants on Soil Nutrient Status and on Growth of Hevea. I. Laboratory Studies on the Mineralisation of Nitrogen in Different Soil Mixtures 175

Effects of Mineral Status and Light on Rubber Formation in Hevea 95

Endrin, control of *Coptotermes curvignathus* 209

Establishment, cover plants 4

Fertilisers, see also Plant nutrients
- effect on mineralisation of nitrogen in soil 175
- mature rubber trees 29
- nitrogen 29, 33, 48, 168
- phosphate 29, 95
- phosphorus 33
- pink disease of *Hevea* 285
- potassium 48
- yield of rubber 36

Flame photometry 86

Flame Photometric Determination of Potassium and Calcium and the Chemical Estimation of Phosphorus, Magnesium and Manganese in Leaves of Hevea 86

Foliar Diagnosis of Mineral Status of Hevea in Relation to Bark Analysis 109

Fomes lignosus, inoculation experiment 223

Fungi
- *Corticium salmonicolor* 275
- *Dothidella ulei* 241
- *Fomes lignosus* 223
- *Helminthosporium heveae* 80
- in roots of poisoned trees 203
- *Oidium heveae* 159

Girth increment
- effects of manuring 35
- yield stimulants 70

Graft polymerisation 208

Growth of *Hevea*
- effect of cobalt supply 130
- effect of zinc supply 160

Growth regulators
- 2,4-D
  - as a defoliant 243
  - tree poisoning 189

yield stimulation 53
2,4,5-T
and latex yield 202
as a defoliant 243
tree poisoning 189, 193
yield stimulation 66

Helminthosporium heveae, Susceptibility of *hevea* seedlings to attack in relation to their nutrient status 80

Inoculation, against pink disease 280
Inoculation Experiment with Fomes lignosus, Klotzch 223
Insecticides
BHC 210
chlorinated hydrocarbons 209
DDT 210
toxaphene 210
Iron, in roots 137

Laminae, nutrient elements in 110
Latex
bacteria 72
bacterial culture media from 19
polymerisation of vinyl polymers 205
preparation of SP rubber 216
stimulation 61
vessels 62
Leaf analysis 114
cobalt content 136
Leaf and stem analysis, legumes 172
Leaf and stem diseases, cover plants 12
Leaf discolouration after tree poisoning 199
Light and mineral status, effects on rubber formation in *Hevea* 95

Magnesium
deficiency symptoms 24
estimation of 86
Magnesium, in rubber seedlings 99

Magnesium-Manganese Interrelationship in the Mineral Nutrition of Hevea brasiliensis 22
Manganese
deficiency symptoms 24
estimation of 86
Manuring, see Fertilisers
Manuring Hevea: Effects of Fertilisers on Growth and Yield of Mature Rubber Trees 29
Masterbatch, Superior Processing rubber 216
Microflora of Hevea Latex: 1. Growth Media 72
Micronutrients
seedlings 95
zinc 159
Mikania scandens, and nitrogen fixation by *Centrosema pubescens* 168
Mineral deficiency 80, 142, 159
Mineral status
and light, effects on rubber formation 95
foliar diagnosis and bark analysis 109
Mineralisation of nitrogen 178
Molybdenum deficiency
and nitrogen supply 142
symptoms 143
Molybdenum status, effects of calcium and sulphate 147
Molybdenum: Effects on the Growth and Composition of Hevea 141

Natural Rubber in Latex as Initiator for Vinyl Polymerisation 205
New planting, use of cover plants 2
Nitrogen
fertilisers 29, 33, 48, 168, 175
fixation 8
in rubber seedlings 99
supply to legumes 168
Nitrogen Fixation by Centrosema pubescens 168
Nitrification, in the soil 8
Nutrient deficiency 80, 142
Nutrient elements in leaves 110
Nutrient status, seedlings 93

Oidium heveae 159
Organic matter and the mineralisation of nitrogen 178

Phosphate, fertilisers 29, 33
Phosphorus
concentration, and rubber in the stem 97
estimation of 86
Pink disease
control 289
geographical distribution 275
incubation 281
symptoms 277
Pink Disease of Hevea Caused by Corticium Salmonicolor 275
Plant composition, see Chemical composition
Plant nutrients 159
for leguminous covers 168
molybdenum, sulphate and calcium 147
nitrogen, calcium, magnesium and potassium for legumes 168
seedlings 80, 128
Planting density, and pink diseases of *Hevea* 286
Poisoned trees, and root fungi 203
Poisoning Experiments with Hevea brasiliensis.
I. Preliminary Trials — Destruction of Trees with 2,4-D and 2,4,5-T 189
Poisoning Experiments with Hevea brasiliensis.
II. Results of a Further Tree Poisoning Experiment with 2,4,5-T 193
Polymerisation
effect of 'amines' in latex 207
effect of peroxidised latex 206
vinyl 205
Potassium
fertiliser 33, 48
in rubber seedlings 99
photometric estimation of 86
Protein content, rubber seedlings 101

Replanting, use of cover plants 4
Root disease, inoculation experiment with *Fomes lignosus* 225
Root diseases, of cover plants 12
Root fungi 203
Roots
after tree poisoning 202

calcium and iron content 137
of poisoned trees, fungi 203
Rootstock, effect on clone 283
Rubber concentration, in seedlings 137
Rubber formation, in seedlings 95
Rubber, Superior Processing 216
Rubber, vulcanised 216

Seedling families, resistance and susceptibility to pink disease of *Hevea* 283
Seedlings
dry weight per plant 133
height measurements 131
Helminthosporium attack 80
rubber concentration 135
stem/girth measurements 132
unselected, stimulation of bark renewal 67
Sheet serum, as bacterial culture medium 19
Shell Fuel Oil, tree poisoning 193
Skim serum, as bacterial culture medium 19
Sodium arsenite, and tree poisoning 189
Soil analysis, nitrogen fixation by *Centrosema pubescens* 168
Soil mixtures, and the mineralisation of nitrogen 175
Soil
and pink disease of *Hevea* 285
moisture 11
nitrification 8
nitrogen 7
nutrient status 7
organic matter 6
structure 6
Soils
coastal alluvial 38
inland 38
South American leaf blight, defoliation of *Hevea brasiliensis* by aerial spraying 241
SP rubbers, wet and dry masterbatch process 216
Stimulation of Bark Renewal of Hevea and its Effect on Yield of Latex 53
Sulphate, effect on molybdenum status 141, 147

Superior Processing Rubber Masterbatch 216
Susceptibility of Hevea Seedlings to Helminthosporium heveae Attack in Relation to their Nutrient Status 80

Tapping system
and manuring 31
and yield stimulation 67
yield of poisoned trees 200
Tomato plants, and cobalt supply 135
Tree poisoning
2,4-D and 2,4,5-T 189
2,4,5-T 193
Diesoline 189
sodium arsenite 189

Vinyl polymerisation, natural rubber latex as initiator 205
Vulcanised rubber masterbatches, Superior Processing rubber 217

Yield
and tree poisons 200
effect of fertilisers 36
stimulation 63
palm oil 53
petroleum greases 53
2,4-D 53

Zinc deficiency, symptoms 160
Zinc: Effects on the Growth and Composition of Hevea 159
Zinc, in laminae 166
